

Seated: Leslie Cooper, George Morrison, Floyd Crane, William Orcutt, Kenneth Miller.
Standing: Mr. Hall, Physical Director; Howard Walker, Clyde Miller, William Margeson, Murray McDowell, Mr. Walker, Coach.

Wrestling

Wrestling, youngest of Haverling's growing family of sports, guided by Coach Walker, made definite progress in 1931-32. From last year's small intramural beginning, it grew throughout the recent indoor season until some thirty boys had participated, and an informal schedule of five meets with outside teams had been successfully completed.

The first three opponents, Alfred Frosh, Mechanics Institute Frosh Reserves, Ithaca College Frosh, respectively, easily defeated the ambitious Bath matmen, but furnished experience which resulted in victory for Haverling in the last two meets, both being with Geneva Y. M. C. A.

The names of the Bath men, twelve in all, who engaged in one or more of the meets are: S. Glosick, M. McDowell, C. Miller, H. Walker, P. Dudley, W. Margeson, K. Miller, L. Cooper, W. Orcutt, W. Easterbrook, G. Morrison and F. Crane.

Six men: M. McDowell, W. Margeson, L. Cooper, K. Miller, W. Easterbrook and F. Crane won distinction by successfully defying all attempts of a college opponent to throw them during a strenuous eight minutes.

The season's outstanding wrestler was Easterbrook, who twice frustrated college opponents and twice won decisive victory by skilful use of the scissors.

Howard Walker, Senior, prominent for his efforts in establishing wrestling, was kept from competition until April by injury. However, in the final meet he won much credit by riding his experienced antagonist, the Geneva instructor, to within a few seconds of a decision. Walker is last year's winner of the "High Spots" trophy for outstanding service to the sport.

Wrestling has been given impetus not only by new equipment purchased by the school, but by the splendid trophy (mentioned above) presented by "Haverling High Spots," school paper, to stimulate activity. Undoubtedly next year will see wrestling on a still firmer basis.
